

Module 1: IdentityIQ Preview

- Identity IQ Business Purpose
- Identity IQ Overview
- Identity IQ Common Components

Module 2: Architecture-Installation-Deployment

- Product Architecture
- Installation Procedure for IdentityIQ

Module 3: Identity Cube and Key Entity

- On-boarding Applications – Delimited Connector
- Identity Cube Overview
- Applications/Connectors
- Identity Mappings
- Aggregation of Data
- Capabilities/Scoping/Workgroups

Module 4: Application On-boarding, Correlation

- On-boarding Applications – JDBC Connector
- Account co-relation
- Application Configuration

Module 5: Connector Provisioning and Functionality)

- Overview of AD Connector
- Connector Configuration
- Aggregation
- Provisioning/Deprovisioning Operations

Module 6: Policies

- Identity IQ Policy Overview
- Policy Types
- Defining Policies
- Discovering and Handling Policy Violations

Module 7:Certifications

- Certifications and Access Reviews
- Types of Certifications
- Certification Lifecycle
- Certification Configuration
- Making Certification Decisions
- Certification Decisions

Module 8:Roles

- Provisioning rules
- Certification rules
- Aggregation rules

Module 9:Workflows

- What is a Workflow?
- Workflows in Identity IQ
- Key Workflow Concepts
- Workflow case, variables, steps and approvals
- Workflow Troubleshooting

Module 9:Debugging

- Advance Analytics
- Debugging
